Congratulations.

Firstly, congratulations on your engagement! What an exciting time you have ahead. Weddings are so very special to me, and I'm incredibly lucky that I get to attend 30+ a year. No two are the same, therefore I will never capture two the same. I photograph YOUR day as it happens. The laughter, the tears, and the moments you didn't even know existed. I will keep things simple, relaxed, and informal from the very first email to the handing over of your gallery Meaning you will not have to worry about a thing. I hope you like my images, my style, and my approach to capturing such a special day. Please don't hesitate to contact me if you have any questions once you've finished looking through my brochure.

My Photogenic style

& COUPLES I WANT TO ATTRACT

I enjoy everything about photographing weddings. I love seeing how different they are from one another, speaking to your guests, and creating beautiful photos for you to have forever. I want you to look back and smile at the big moments, the little ones and all the others in between. After all, they are collectively what make up your wedding day. Of course, I get the traditional images of a wedding too, but why not make your own tradition or change them up a little bit. Not every wedding has to be the same.

I like to attract couples who don't take themselves too seriously. Those who won't mind stepping outside in the rain or onto the beach if it means getting "that wow shot" that will be with them forever. You're not going to be able to re-do the day again, so you must make sure you can do your best to relive it through your photographs. I work in the most unobtrusive way possible. I understand how conscious people can be about having their photographs taken. So the best way to handle this is to make sure they are unaware I'm photographing them. Especially for those fun candid shots.

DETAILS

Not many people are used to having their photo professionally taken, which is why it's nice to get the practice in before the big day. It'll help us get to know each other even better, which will hopefully help you feel more relaxed in front of the camera. You will get to know what poses and angles you feel most comfortable with, meaning we can perfect it before the wedding.

LOCATION

I recommend having the photoshoot 5-6 months before your wedding day, in a Norfolk location of your choice. As you've probably realised, I'm not one for holding back images. You will receive at least 20 edited images (but usually much more) from your pre-wedding photoshoot in an online gallery. All images are ready for you to download and use as you please.

FREQUENTLY *Asked Questions*

QUESTION ONE

How would you best describe your style?

Timeless. My main goal is to photograph your wedding as I see it. Only enhancing the light and colour I see on the day, so your photos will look as amazing in 15 years time as they did on the very first time you saw them.

QUESTION TWO

Do you have backup equipment?

Yes, I even have backups for some backups! I shoot with two camera bodies on the day to optimise shooting time, and have a third body as a backup. As for the files, after your wedding, your images are backed up 3x to various different databases.

QUESTION THREE

Do you use a second shooter?

I don't, I've photographed weddings of around 250 people alone before and not felt like I needed one, however if you have more guests or various locations you'd like to be photographed at the same time then a second photographer can be discussed.

QUESTION FOUR

Are you insured?

Yes, I'm fully insured and have provided most venues I work at with my details and a risk assessment. If your venue is one I've not been to before I will be happy to forward them on if needed.
